Weber, Kelsey Wheeler, James Gordon, Justin Sanders, Hong Moulton, Kai Wang, Taek-Kyun Kim, Yuqing He, Tatiana Santos, Stuart Woods, Patty Lee, David Donkin, Eric Kim, Laura Fraczek, Joseph Lykins, Farida Esaa, Fatima Alibana-Clouser, Sarah Dovgin, Louis Weiss, Gael Brasseur, Dyann Wirth, Michael Kent, Leroy Hood, Brigitte Meunieur, Craig W. Roberts, S. Samar Hasnain, Svetlana V. Antonyuk, Colin Fishwick & Rima McLeod

Correction to: *Scientific Reports* <https://doi.org/10.1038/srep29179>, published online 14 July 2016

This Author Correction corrects the following errors in the Article. The authors neglected to cite a relevant study related to the isolation of the EGS strain of *Toxoplasma gondii* from amniotic fluid from a congenitally infected Brazilian fetus. As a result, in the Introduction,

“To address these challenges, we characterized the EGS parasite (Fig. 1), isolated in 1994 from amniotic fluid of a congenitally infected Brazilian fetus²⁵, that form cyst-like structures *in vitro*.”

should read:

“To address these challenges, we characterized the EGS parasite (Fig. 1; ATCC[®] PRA-396), isolated in 1994 from amniotic fluid of a congenitally infected Brazilian fetus¹ that form cyst-like structures *in vitro*²⁵.”

In the Results section, under subheading ‘Characterization of EGS strain develops novel *in vitro* models to test compounds’,

“This AP2 represses bradyzoite to tachyzoite conversion, among other differences (Table 1; Fig. 1c; Supplement A: Box and Figure S2, Supplement B: Excel Table S1).”

should read:

“This AP2 represses tachyzoite to bradyzoite conversion², among other differences (Table 1; Fig. 1c; Supplement A: Box and Figure S2, Supplement B: Excel Table S1).”

In Figure 6d, the incorrect image for transfected EGS was used. The correct Figure 6d appears below as Figure 1.

Published online: 23 March 2020

Figure 1.

Finally, in the Discussion section,

“This *Apetela 2* plant like transcription factor gene is known to drive tachyzoite switch by repressing bradyzoite genes.”

should read:

“This *Apetela 2*, plant-like transcription factor gene, *AP2IV-4*, represses bradyzoite genes during the tachyzoite cell cycle, thereby preventing commitment to the bradyzoite developmental pathway².”
