Leadership, Empowerment, and Development in STEM (LEADS)

ISB LEADS is a program that develops STEM leadership skills for high school students. Students gain confidence and skills, creating a strong community of future STEM leaders.

In 2024, ISB Education hosted two cohorts and served 26 students with essential lessons on communication skills, leadership qualities, and STEM career paths. Your 2025 sponsorship helps support two more cohorts of young scientists.

Your sponsor logo will be promoted on outreach materials that reach 70% of Washington state teachers and students and over 60,000 annual users on our education websites.
